access control

NOKĒ™ SMART ENTRY

What is the Nokē™ Smart Entry System?

The Nokē™ Smart Entry system is a cloud-based digital key management solution, designed specifically for the self storage industry, that allows tenants entry to a facility using a smart phone. The electronic lock comes with a smart phone application for use on iOS and Android. The application is feature-rich, with notification options to operators, managers and tenants and is available in multiple languages.

The secure system activates the motion sensors immediately after a unit door closes and will provide direct notifications of movement within a unit. If the temperature falls or increases below a preset value, this can also provide an alert.

The Nokē Smart Entry system is truly game-changing for the self storage industry, offering a 2-year warranty and technical support 24 hours 7 days a week, this system looks smart and works smart.

Nokē™ Volt is the original Smart Entry product by Janus International. The electronic lock is mounted on the inside of the unit for enhanced security and hard-wired to provide consistent power, making this the ideal solution for new construction and expansions. Each unit is provided with an individual Unit Controller, Electronic Lock and Thermal Motion Sensor.

nokē ONE
 no key. no problem.
 BY JANUS INTERNATIONAL

Nokē™ One is an electronic smart lock that fits on the outside of the individual self storage unit door. These smart locks fit seamlessly to both roller doors and swing doors and were designed to improve the security of individual self storage units while also making life easier for site managers by automating the lock check and overlocking processes. This wireless locking system is the ideal solution for drive up units, portable buildings, freestanding lockers and retrofit for any facility.

| | Nokē One | Nokē Volt |
|-----------------------|--|--|
| Lock Placement | On Door | Inside Door |
| Battery | Battery powered 2-year battery life | Hard-wired with a battery back up |
| Installation | Quick installation times | Specially trained installers on site |
| Sensors | Thermal motion sensor | Thermal motion sensing (optimal location) |

NOKĒ ENTRY CONTROLLERS

Gates, Sliding Doors, Entry Doors, Lifts and more can be linked to the Smart Entry system using Nokē Entry Controllers or Nokēpads. All entry points can be remotely opened.

OPERATOR BENEFITS

» **Cloud-Based Application, Management, Authentication & Security**

A flexible and secure cloud-based application with a centralised setup, secure encrypted authentication and is easy to use.

» **Automated Overlocking (and Release)**

Automatically restrict access to the facility and overlock and release the individual unit, when integrated with your property management software.

» **Remotely Unlock Entry Points and Vacant Units**

Cloud connectivity via the Nokē Gateway Hubs allows operators to remotely open access points and vacant units.

» **Cyber-security**

State-of-the-art data encryption and cloud-based security that has been successfully tested by a distinguished 3rd-party cyber-security firm for likely threats.

» **Valuable Data (Data Mining)**

Monitor tenant activity allowing you to track usage and early identification of potential tenant move-outs.

» **Activity or Audit Trail**

Operators and tenants can view when, where and who gained access to a facility or individual units.

» **Long-term Solutions**

Continuous improvement of solutions to deliver new features and functionality that enhance security management and entry control.

We are happy to work with Janus International Europe and chose the Nokē Smart Entry System for our facility. I see huge potential for Janus with the Nokē Smart Entry System and this gives our customers the option to reserve their storage space online and move in straight away.

Augusts Iesalnieks, CEO and Co-Founder,
Self Storage Riga

TENANT BENEFITS

»» Mobile Access

Convenient access for tenants, no getting out of the car at the gate, no access codes to remember and no keys to lose.

»» Storage Smart Entry App

Consolidating all activity in one convenient app. Touch icons to access entry points and units. View facility information, make a payment*, check activity and access help & support.

»» Digital Key Sharing and Management

Provide tenants the ability to instantly “share” (and revoke) customised access - lots of flexibility while maintaining tractability.

»» Motion Sensor (Inside Units)

Helps alert facility managers to unauthorised access from other units (via the ceiling or partition walls) with motion sensor notifications. Reducing the risk and reassuring tenants their items are stored securely.

»» Wireless Key Fob Option

No smart phone or don't want to use one? A small physical fob device utilises Bluetooth and is encoded with a digital key that opens gates, doors, and locks without a smart phone - provides a non-smart phone option.

»» Smart Phone Notifications

Set up notifications to alert the operator and tenants of access to a facility or unit. An alert is sent to the site if a unit door is not closed properly once a tenant leaves the facility, which improves security and reduces risk.

*Requires mobile-enabled payment portal with link

The continuity of service to our business customers has been the biggest benefit to not being physically on site – and in that respect Nokē has been invaluable as we have not had to let any of our customers down.

Rory Windham, Director, Go Store Self Storage Ltd

TECHNICAL SPECIFICATION

Access Points:

Main Gates, Sliding Doors, Lifts and more using Nokē Entry Controllers or Nokēpads

Smartphone App Compatibility:

- Apple iOS™ (iOS 10.2 or later)
- Google Android™ (Kit Kat 4.4 or later)
- Bluetooth (version 4.0 or higher)

Integration with Property Management Software:

40+ includes, 6Storage, EasySpace, SiteLink, Space Manager, Stora, Store365, Storman and more.

Door Options:

- 650R Roller Door
- Flat Swing Door
- Hi-Security Corrugated Swing Door

Offline Capabilities:

If the internet goes down in a facility, existing tenants can still unlock their units using Bluetooth and the smartphone app. While the internet is unavailable activity and audit data is stored locally on each Nokē device. Once the internet is restored, that information will be sent to the cloud and displayed in the web portal or smartphone app.*

*Some Nokē Smart Entry features may be unavailable during an internet outage.

SITE REQUIREMENTS:

Power: 230V AC power to each Access point. If Nokē Volt is chosen, additional 230V AC power supplies will be needed for each Altronix Power Supply (approximately 1 per 50 storage units) to hard-wire power to the unit controllers.

Wi-Fi or Mobile Data: Wi-Fi or cellular data should be available within the shop/office and entry points but is recommended throughout the complete facility to ensure users can complete the smartphone authentication process wherever they are within the facility.

Network: CAT6 cable will be required to access points and various locations throughout the storage facility to enable cloud connectivity.

A spare network port for installation of a network switch (Power over Ethernet) within the technical room.

Internet: Internet should be available and have speeds of at least 5 Mbps upload and 5 Mbps download time.

WHAT'S INCLUDED

- Nokē One or Volt Electronic Locks, Motion Sensor and Digital Overlock to any smart units
- Nokē Entry Controller or Nokēpad to access points where specified
- Nokē Smart Entry Network Hubs
- Nokē Smart Entry Smart Phone App & Web Portal Application
- PoE Switches
- Software Support via phone/email or chat (valid for 12 months from system launch)
- Initial Training for the site management team

Nokē Volt Only

- Altronix Power Supplies
- Low Voltage 2 core wiring
- Lock Bar
- Emergency release button placard
- Release button label

ADDITIONAL OPTIONS

Additional Options:

- Integrate with 3rd party alarm systems
- Sounders installed in corridors
- Key Fob

Installation:

All Nokē Smart Entry hardware and network switches will be supplied and fitted by Janus trained installation teams. Full training will be provided to operators prior to completion of the installation.

Connection of the Nokē Smart Entry hardware to the access points should be completed by the specialist contractor.

230V AC power supplies/connection and CAT6 cable runs should be installed by others prior to the Nokē Smart Entry installation.

Warranty: 2-year limited warranty for product and installation

Technical Support: We offer a 24/7 technical support service via phone, email, and live chat.

“

Working with Janus was very pleasant. Even during the COVID-19 pandemic, the Janus team was always reachable and in contact with us. We are very happy with the installed storage and the Nokē access control system.

Nico Weichbrodt, Founder and CEO, Löwenlager

It was when I was sitting on a beach in Tenerife drinking my morning coffee when I received 3 phone calls, these phone calls led to 3 bookings and move ins within one morning. That's when I realised how great remote access and Nokē was.

Gavin Shields, CEO, Store Stuff
